

DI-AMMONIUM PHOSPHATE

DAP 18-46-00 | Binary fertilizer, complex granule

Use

DAP is a concentrated phosphate fertilizer. It can be used directly for soil fertilization or as raw material for blends.

Packaging

In bulk

Characteristics

Physical characteristics

pH: 7.5

Loose density: 0.90

Packed Density: 1.02

Physical State: Granule

Appearance: Light brown/brown and black

Chemical characteristics

Nitrogen: 18 % (N)

Phosphorus: 46 % (P_2O_5)

OCP

North
America
